PEDESTRIAN TUNNEL CLOSURES AT DULLES

Closures will be overnight only—shuttles available 24/7

A maintenance project at Washington Dulles International Airport will affect pedestrians traveling between Daily Garage 1 and the Main Terminal. Nightly work beginning on April 2, 2006 will force overnight closures of the pedestrian tunnel which connects the two facilities. The tunnel will close each evening at 10:00 p.m. and re-open the next morning at 5:00 a.m.

Passengers should use the Parking Shuttle to travel this route during closure hours. The shuttle operates around the clock. Additional signage will be in place so passengers can easily avoid the closed tunnel and board the shuttle.

Note: the pedestrian tunnel connecting the Main Terminal to Concourse A and B is not affected by this project. It will remain open.
