

Metropolitan Washington Airports Authority

DRIVE TO RIDE

Ronald Reagan Washington National Airport

Reagan National serves the region primarily with domestic air service. Flights are limited to ensure that the Airport does not become congested and continues to operate efficiently.

Fast Facts – Air Service

In 2008, Reagan National handled:

- 2,600 weekly flights to 72 locations;
- 391 daily flights to 66 domestic cities; and 9 daily flights to 4 international cities;
- nearly 18 million passengers; and
- 276,000 aircraft operations.

Fast Facts - Construction

In 2008, Reagan National:

- completed restoration of the historic Terminal A façade;
- opened a new Airport Fire and Rescue facility;
- completed a new consolidated communications and emergency operations center to handle emergency communications for Reagan National and Washington Dulles International Airports;
- updated restrooms; and
- improved lighting and carpeting in public areas.

The Airports Authority continues to focus on maintaining the standard of excellence provided by the facility improvements with customer service initiatives.

In 2009, construction will:

- add over 1,400 parking spaces to the parking garages.

The Dulles Corridor

The Airports Authority has been responsible for a key part of Northern Virginia's transportation network since its inception in 1987 when it took over the operation of the two Airports and the Dulles Airport Access Highway, a critical link between Dulles International Airport and the region. In 2006, the Airports Authority signed a Memorandum of Understanding with the Commonwealth of Virginia that would enable the Airports Authority to operate the Dulles Toll Road and to issue bonds backed by the Toll Road revenues to build rail through the Dulles Corridor to Dulles Airport and beyond to Loudoun County. In 2007, the Airports Authority signed a contract with Dulles Transit Partners on behalf of the Commonwealth of Virginia and began to put in place the construction program. Effective November 1, 2008, the Virginia Department of Transportation transferred responsibility for the daily operation, maintenance and control of the Dulles Toll Road to the Airports Authority. On March 10, 2009, the U.S. Department of Transportation committed \$900 million in federal funds so construction of the first phase of the Dulles Corridor Metrorail Project could begin. The Airports Authority is working to complete the first phase of the Project to Wiehle Avenue by 2013 and the final phase to Loudoun County by the end of 2016.

Washington Dulles International Airport

Dulles International is one of the busiest and fastest growing airports in the mid-Atlantic region and the 4th busiest trans-Atlantic gateway to the U.S. from Europe.

Fast Facts – Air Service

In 2008, Dulles International handled:

- 2,400 weekly flights to 102 international and domestic locations;
- 333 daily flights to 83 U.S. cities; and 59 daily flights to 43 international cities;
- approximately 24 million passengers; and
- 360,000 aircraft operations.

D2/Dulles Development Program

To keep pace with future growth and to continue to provide the traveling public with improved services and facilities, the D2 (Dulles Development) program has been in progress since 2001 with nearly \$3 billion invested in Airport improvements, to date.

In 2008, the Airports Authority:

- expanded B Concourse and added 15 new gates and several new concessions;
- opened the 4th runway; and
- opened a new Airport Fire and Rescue facility.

In 2009:

- a new, on-Airport, automated train system called AeroTrain will begin operation;
- expanded terminal and security screening facilities will be completed;
- the International Arrivals Building expansion will continue; and
- rehabilitation of the center runway will proceed.

All of these efforts are designed to keep Dulles International a prominent international gateway to the Nation's Capital and a major economic contributor to the region well into the future.
